

International Symposium on Material and Processing at IIT Delhi

Three days international symposium on 'Processing and Fabrication of Advanced Materials (PFAM XVII)' is being organised in IIT Delhi from December 15, 2008. This symposium is being organized first time in India. The delegates and experts, from various fields of materials and processing, from 21 countries are participating in it. It was inaugurated by Dr. A. Sivathanu Pillai, Distinguished Scientist and Chief Controller, DRDO. Dr. Pillai in his key note address informed that even ancient India was very advanced in science and technology. He informed about the pioneer research in the field of materials and their processing in DRDO and India. He stressed on collaborative efforts among academia, R&D institutions and industries for future developments. Prof. Surendra Prasad, Director, IIT Delhi delivered the presidential address and told the importance of advanced materials. During the inauguration, Prof. JP Subrahmanyam, Prof. TS Srivatsan, Prof. N. Bhatnagar, Dr. Anil Wali, delegates, faculty members and students were present.
